

Participants needed for a

# SPEECH AND BRAIN RESEARCH STUDY

## YOU'RE INVITED!

We are looking for participants for a research study about children's speech. The study involves talking and listening tasks, an ultrasound image of your tongue, and a brain MRI. The study is being conducted by Dr. Caroline Spencer, Director of the Speech Production, Imaging, and Neuroscience Lab at Indiana University.

### WHO?

We are looking for children participants ranging from **5 to 6 years old** with or without a speech sound disorder.

### WHERE?

Study visits will take place at the Voice and Speech Production lab and the Imaging Research Facility at Indiana University-Bloomington.

### WHEN?

Study visits will be scheduled at your convenience. Total study time will be about 4.5 hours. This can be split into two visits (speech testing + ultrasound, 2.5 hours, brain MRI 2 hours).

## INTERESTED?

Those interested in participating or learning more can contact the IU Speech Production, Imaging, and Neuroscience Lab at [spinlab@iu.edu](mailto:spinlab@iu.edu)
